## Polycom® OTX® 100

Where ideas flow, problems are solved—and productivity soars.

Uniquely enabling people to work more effectively across distances, the Polycom® OTX® 100 can enhance the productivity of your organization's key resources and, through Polycom's strong commitment to open standards, natively integrate with best-in-breed unified communications tools and environments.

Polycom OTX 100 delivers across-the-table video experiences, accelerating productivity and decision-making. It is a fully integrated solution for consistent, high-quality interaction at every location. It uses the same design language as the three-screen Polycom® OTX® RealPresence® Studio, and works seamlessly with other telepresence, room, desktop or mobile video participants.

It is ideal for smaller meeting rooms or executive offices and seats up to 4 participants on video. It can show either 2 people in full-size, or up to 4 people in zoomed-out mode for added flexibility. While in either a point-to-point or multipoint call, users can select the camera-zoom mode for their OTX 100 based on how many participants are in their room.

Two in-table 22" monitors put content right in front of you for the best view of anything being shared. The monitors rise from the table when needed, and stay hidden when they're not, giving you plenty of workspace.

Polycom OTX 100 is designed to be used for more than just video meetings. The unique table design lets you use it as a regular conference table, seating up to 8 participants for additional flexibility. Content can be shown on the large 65" display when not in a video call, making OTX 100 a collaboration environment for any type of meeting.

The Polycom OTX 100 Compact includes the same "video wall" and core technology as the standard Polycom OTX 100 model, but without the table. This enables you to select your own furniture to match unique styles and collaborative environments, while maintaining consistency with the standard OTX 100, OTX RealPresence Studio and other Polycom solutions.
